

CerCol F77 Cerliv Maxi Deep Self Levelling Compound 3-30mm 25kg

A self-binding, fast drying/hardening mortar based on nanotechnologic fluidifiers, special binders and synthetic additives.

Very easy to pump. Used for levelling substrates in layers from 3mm to 30mm of depth.

Excellent spreading ability and workability: once it has hardened, it possesses excellent resistance to abrasion and comprehensive strength.

Suitable for all types of floor cladding (PVC,parquet,carpeting,rubber,ceramic tiles,etc.)

Suitable for heated screeds making this deep levelling compound particularly suitable for areas with underfloor heating.

Rating: P4S

Coverage: 1.7kg per 1mm of depth per square metre

Product Code: CERCOL30

Product Description: F77 Cerliv Deep Levelling Compound 3-30mm P4S 25Kg
