

CerCol F20 Extra White CTA Standard Set Tile Adhesive 20kg

Is a standard setting white powder adhesive for ceramic, porcelain and natural stone tiles on walls and floors.

Suitable for large format tiles up to 600x600mm in size. This single-component quartz-based adhesive is highly flexible and has properties that will accommodate most expansion & contraction. Making the F20 standard adhesive particularly suitable for areas with underfloor heating. The F20 has no vertical slip.

Adhesive Rating: C2TE

Coverage: Approximately 5m per 20kg bag
