

Our new range of CerCol primers are suitable for the preparation of most tiling applications, absorbent surfaces & non-absorbent surfaces.

**F.28 Appretto General Purpose Primer 5kg - Suitable for applications on absorbent ( porous ) surfaces**

**Product Code: CERCOL07**

- Indoor & outdoor use
- Improving the bonding power of cement-based tile adhesives
- Allows for the uniform absorption of porous substrates
- Strengthening the surface of substrates, plasters or brickworks
- Fixing powder on the substrates
- Treating anhydrate and hemihydrate screeds and all gypsum based substrates before application of cement-based tile adhesives
- Treating absorbent substrates ( cement-based screeds ) before application of cement-based, self-levelling compounds.

**F.29 ECO Hard Surface Primer 5kg - Suitable for applications on hard or non-absorbent purposes. Specialised primer.**

**Product Code: CERCOL08**

- Indoor use only
- Treating existing floors in glazed ceramic tiles, porcelain tiles, bricks and natural stones before laying a new floor with cement-based tile adhesives
- Treating very compact concrete substrates before the application of cement-based tiles adhesives
- Treating non-absorbent substrates (existing ceramic/natural stones, floors etc.) before the application of cement-based self-levelling compounds
- Treating epoxy paints or resins before the application of cement-based tile adhesives
- Treating well-bonded residue of old adhesives and resilient materials in general.
