

What is COMFORTZONE Underfloor Heating?

COMFORTZONE Underfloor Heating is a luxurious and revolutionary heating system comprised of ultra thin, self-adhesive matting. Economical and affordable, this matting is laid underneath ceramic, porcelain and natural stone tiles. Controlled by a touch screen thermostat, you will have optimum control when it comes to how warm you would like your room to be. You may also add insulation board when fitting the matting for extra warmth and efficiency.

Essential Living Areas Where COMFORTZONE Underfloor Heating Can Be Used

COMFORTZONE Underfloor Heating is an essential luxury add on to any wet room or bathroom area. It may also be used in kitchens, utility rooms and living spaces where there are tiled floors or walls.

Cost Effective & Energy Efficient

Affordable and economic, COMFORTZONE proudly boasts an inexpensive running cost of just €0.22cent a day! Any size mat costs €50 per metre up to 12 metres, then just add a touchscreen thermostat for €100.

Touch Screen Fully Programmable Thermostatic Control At Your Finger Tips

The COMFORTZONE touchscreen thermostat enables you to create your own personal heating schedule. You may select and choose what time and what temperature you would like your underfloor heating to start at for a particular day, or for a 7 day schedule that suits your lifestyle.

Or for a more modern control, COMFORTZONE introduces their new to the market Thermotouch 4.3IC full colour 4.3inch screen thermostatic control panel. This includes 5 flexible heating modes, 7 day heating program planner and floor sensor. The Thermotouch 4.3IC is now available at btw!

COMFORTZONE adding luxury and comfort to any room.
